

Name: _____

Date: _____ Period: _____

Minerals and Rocks

The Physical Setting: Earth Science

Supplemental: Metamorphic Rocks

Directions: Read each question carefully and fill in the correct answer.

Base your your answers to questions 1 through 3 on the cross section below, which shows the bedrock structure of a portion of the lithosphere. Letters A through D represent locations in the lithosphere.

1. Identify one of the most abundant minerals in the metamorphic rock at location A.
2. Explain why the type of rock changes between locations B and C.
3. Identify the grain size of the metamorphic rock at location D.
4. Where can contact metamorphism occur?
5. Name a metamorphic rock that exhibits a foliated texture and is fine grained?
6. Name a metamorphic rock that reacts with hydrochloric acid (HCl)?
